

# Exercise....

- 做出一個平時會上數0~9數字的七段顯示器，但當按下按鈕時會停在某個數字，放開按鈕又可繼續上數。

- 提示: Time out 、 mouse event

# Exercise....

- Please try to design an LabVIEW code with following functions.
- One 7-segment display on front panel for displaying the up count result during run mode (execution).
  - One OK button for pausing controlling the above display.
  - The 7-segment will count 0 to 9 in order. However, if the user press the OK button and do not release the button, the number will stop. Until the OK button be release will the number continue counting.
